Master Black Belt Development Program

What is a Master Black Belt?

Identifying, supporting and delivering the organisation's goals to realise its vision is the strategy that many organisations struggle to achieve. The Master Black Belt's role is to work with the leadership team and make the vision a reality, through the delivery of business improvement.

An MBB, besides being knowledgeable in the tools and techniques of Six Sigma and being able to conduct Six Sigma projects, is also a coach, facilitator, mentor, program leader, and change agent. An MBB liaises between the sponsor, executive and improvement champions managing multiple projects to set objectives, targets, and to achieve lasting results.

What Skill Elements Make A World Class Master Black Belt?

- ✓ Leadership – *Ability to achieve through others*
- ✓ Project Management – *Plan it, then deliver it*
- ✓ Technical – *Advanced Lean Six Sigma Techniques*

Master Black Belt program focuses on how these skills can be targeted and improved upon. The program which was exclusively delivered in-house for its global clients, is now being offered in Asia to a wider audience, due to repeated requests.

The MBB program has 3 stages:

1. Pass the pre-requisites – are you ready to be a MBB?
2. Complete & pass the 6 day MBB course with Exam
3. Complete the individual development plan that extends beyond the classroom

MBB Ready - Each candidate will be assessed for inclusion in this program which will bring the Master Black Belt Certification standard that GE, J&J, Pfizer, Schneider and many others have trusted as the first reference.

Development Plan - Each candidate will be mentored so they can receive their certification when they have achieved the world-class standard.

**Session 1:
20th – 22nd Nov 2019**

**Session 2:
27th - 29th Nov 2019
Kuala Lumpur,
